EXPERIENCE

Product Owner

July 2026 – Present

StarnSparks

West Jakarta, ID

- Act as Product Owner across StarnSparks' internal product portfolio, engaging directly with founders/stakeholders to scope, prioritize, and structure new product initiatives from idea to backlog.
- Set up and manage product workspaces in Linear, writing project briefs, goals, and issue backlogs for each initiative and coordinating execution with the development team.
- Led product ownership across 8 initiatives opened in Linear between late July and September 2026, spanning POS/retail-tech, event-tech, parenting/ed-tech, media, and physical/IoT products.
 - POS SNS Enterprise (Jul 2026) — enterprise multi-branch POS project scoping, assigned with the development team.
 - Financial Planner App (Jul 2026) — personal financial management app concept and requirements.
 - Landing Page StarnSparks (Aug 2026) — company landing page product scope.
 - WedPlanner Suite by SNS (Aug 2026) — combined wedding planning (budget, timeline, guest list) and digital invitation/RSVP/QR check-in product; wrote executive summary and problem statement.
 - Google Review Tap NFC & Barcode Card (Aug 2026) — physical NFC/QR tap-card product to help merchants collect Google reviews; defined pricing and unit economics.
 - KODOMO APP (Aug 2026) — parent-child task management and discipline gamification app; defined core goals (parent monitoring, child activity record & appreciation, discipline-building).
 - POS FnB (Sep 2026, most recent) — led the full developement road map plan of SnS POS hybrid dine-in + counter F&B POS (tables, modifiers, KDS, recipe/COGS, cash shift), including a full audit and 4-phase roadmap.
- Delivered a continuous six-week run of product discovery and backlog-building work, taking each initiative from its first Linear issue through active planning or in-progress development.

Product Owner

November 2025 – Present

PT. Trawlbens Teknologi Anak Indonesia

East Jakarta, ID

- Engage with business stakeholders to identify goals, challenges, and desired improvements in existing or new IT products and services.
- Define, prioritize, and manage the product backlog based on business value and user needs.
- Translate business requirements into clear, actionable user stories for the development team.
- Communicate product roadmaps and functional specifications to development and project teams.
- Monitor product performance metrics, analyze issues, and recommend data-driven improvements.
- Prepare periodic product reports, dashboards, and performance analyses for management review.
- Ensure product quality, usability, and compliance with organizational and client standards.
- Act as a subject-matter expert in IT services, digital transformation solutions, and enterprise platforms.
- SaaS Logistics Platform: Improvement of a cloud-based logistics management system supporting the full cycle from lead to manifest to delivery and billing.
- Asset Management & HRIS System: Built from scratch (Kanban Board) an integrated Asset Management & HRIS system to automate asset reporting, payroll, and human resource management, enabling seamless synchronization across departments and improving back-office efficiency.

Product Implementation Lead

March 2023 – May 2025

PT. Simplefi Teknologi Indonesia

South Jakarta, ID

- Supervise / monitor all active implementation projects.
- Ensure complete documentation for each active implementation project.
- Provide guidance and assistance for critical issues that may arise during implementation.
- Ensure team members' continuous learning of product features, functionalities, and customizations to address client issues, questions, and concerns in a more detailed and precise manner.
- Ensure proper coordination of client-specific customizations and requirements with related departments such as Product Manager, Product Ops, and Product Growth Management.
- Ensure proper documentation of all problems, issues, and related resolutions, fixes, and support instances raised through any mode of communication.
- Monitor client inquiries/issues and resolutions from the time raised until closed.

System Implementation Specialist

May 2021 – March 2023

PT. Simplefi Teknologi Indonesia

East Jakarta, ID

- Handled 50+ wholesalers spread across several areas in Jakarta & Banten to maintain Software-as-a-Service (SaaS) product usage.
- Educated users on the POS system and mobile apps system.
- Contributed system improvement ideas based on user and field analysis.
- Helped maintain existing issues and find temporary solutions.
- Reported issues found to the tech support team.
- Maintained good communication with suppliers to meet their system needs.
- Responsible for maintaining and controlling suppliers' Gross Merchandise Value (GMV) growth based on recorded data.
- Responsible for training/teaching/educating suppliers' PIC on SaaS system usage and ensuring the system ran smoothly.

Marketing Business Development

July 2019 – May 2021

PT. TriasaAdipradana

Central Jakarta, ID

- Introduced products to customers via email, social media, and online marketplaces.
