SUMMARY

Product Owner with 5+ years across product ownership, software implementation and business analysis in SaaS, POS/retail-tech, logistics and HR systems. I sit between the business and the development team: finding out what stakeholders actually need, ordering the backlog by business value, and writing user stories and acceptance criteria that engineers and QA can work from without guessing. Before moving into product, I spent four years implementing software for 50+ wholesalers, so I know what happens to a feature after it ships.

SKILLS

Product	Product Roadmap · Backlog Management · User Stories & Acceptance Criteria · PRD · Sprint Planning · Prioritization (RICE, MoSCoW) · Product Discovery · Competitor Analysis · Agile / Scrum
Tools	Linear · Plane · Jira · Notion · ClickUp · Figma · Miro · Whimsical · Canva
Technical	SQL · Git / GitHub · System Architecture · Visio · MS Office

EXPERIENCE

Product Owner Consultant

Jul 2026 – Present

StarnSparks · West Jakarta

- Own the product side of StarnSparks' internal products and client projects: scoping with founders and stakeholders, prioritizing, and taking each initiative from discovery to a backlog the team can build from.
- Set up product workspaces in Linear and Plane; write project briefs, feature specs and backlogs for the development teams.
- **HRIS Starnsparks** (Oct–Nov 2026, client project): wrote the PRD and broke it into 16 modules and 93 work items. Set one story format with Given / When / Then criteria, and one card that moves from PO to UI/UX, frontend, backend, QA and deploy. Case study on GitHub.
- **POS F&B** (Sep 2026): led the roadmap for a hybrid dine-in and counter POS, including KDS integration, recipe/COGS tracking and table management.
- **POS SNS Enterprise** (Jul 2026): scoped a multi-branch POS architecture and coordinated technical execution with the developers.
- **Other initiatives** (Jul–Aug 2026): WedPlanner Suite (wedding planning with digital invitations, RSVP and QR check-in), KODOMO (parent–child task gamification), a Google Review NFC/QR tap card (pricing and unit economics), and a Financial Planner app (product concept and core requirements).

Product Owner

Nov 2025 – Mar 2026

PT. Trawlbens Teknologi Anak Indonesia · East Jakarta

- Worked with executives to pin down strategic goals, operational bottlenecks and where the product could improve.
- Prioritized the backlog by business value; wrote user stories, functional specs and acceptance criteria; tracked KPIs to back optimization proposals with data.
- **SaaS Logistics Platform:** led feature work on a cloud system covering lead generation, manifest, delivery and billing.
- **Asset Management & HRIS:** designed the system from scratch on Kanban-based workflows to automate payroll, asset tracking and HR processes.

Product Implementation Lead

Mar 2023 – May 2025

PT. Simplefi Teknologi Indonesia · South Jakarta

- Supervised every active implementation project, keeping delivery on time and documentation complete.
- Gave tier-2 technical guidance and resolved issues at critical implementation stages.
- Coordinated Product Managers, Product Ops and Engineering on client-specific customizations, and trained the team on new features so they could troubleshoot faster.

System Implementation Specialist

May 2021 – Mar 2023

PT. Simplefi Teknologi Indonesia · East Jakarta

- Handled onboarding and retention for 50+ FMCG wholesalers across Jakarta and Banten.
- Trained client operations teams on the POS system and mobile app; used field usage data and feedback to propose feature improvements.
- Monitored GMV growth across assigned suppliers and cleared system blockers.

Marketing Business Development

Jul 2019 – May 2021

PT. Triasa Adipradana · Central Jakarta

- Ran market research and competitive analysis to find new growth opportunities.
- Centralized sales and customer data to compare category performance; ran multi-channel digital campaigns and represented the company at trade shows.
